Introduction

The AWK-5232 Industrial a/b/g/n Wireless AP/bridge/client is an ideal wireless solution for hard-to-wire situations and all mobile equipment which is connected over a TCP/IP network. It can provide a faster connection and wider range than 802.11g models, especially a noticeably stronger connection at distance. With two independent RF modules, the AWK-5232 supports a great variety of wireless configurations and applications, and the redundant wireless connections increase the reliability of the entire wireless network. The AWK-5232 is compliant with the essential sections of EN 50155, covering operating temperature, power input voltage, surge, ESD and vibration. The AWK-5232's two DC power inputs increases the power supply reliability, and it can also be powered via PoE+ for easier deployment.
