Introduction

The DN-800I series are current input sensor. The maximum input range is from ± 1 A to ± 50 A and can be attenuated to ± 4 V. The "I" version provide 3000VDC intra-modules isolation and 3000VDC channel to channel isolation to avoid the noise interference from inputs to outputs or channel to channel. It can be used with the analog input modules such as I-7017 and I-7520 etc. to measure the high current.
